

How-To:

Fiery Image Boost Preset for Fiery System 9R2/9eR2 and Earlier

Fiery Image Boost Preset for Fiery System 9r2/9eR2 and Earlier

Overview of Fiery Image Boost Preset

The Fiery® Image Boost preset helps you produce brighter, cleaner and more pleasing images and smoother vector gradients your customers will notice. You can apply the Image Boost preset when submitting print jobs through the Fiery print driver.

Fiery Job Presets allow you to create automated job submission workflows for repetitive job settings. This reduces touch points on a job, reduces errors and speeds up submission.

Benefits

- Produce brighter, cleaner images and smoother vector gradients your customers will notice.
- Easy to install and use.

Objectives

Create a Fiery Driver Preset to improve image quality in a print job.

Requirements

Fiery system software: Fiery System 9R2, Fiery System 9eR2 and earlier

Preparation

Install the Fiery print driver in a Windows or Macintosh client.

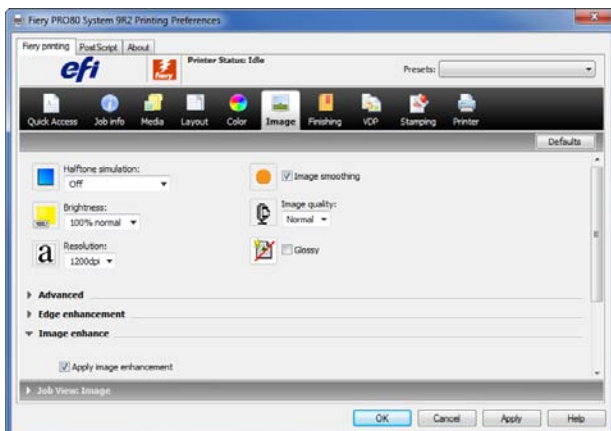

- Locate the Sample Files: **Connect_Alumni_Newsletter_LTR.pdf** or **Connect_Alumni_Newsletter_A4.pdf**

**Note:**

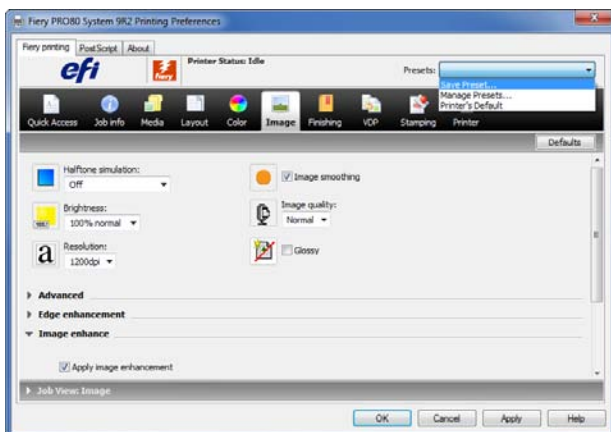

Each output device will have different procedures for configuring and printing the finished document. If needed you may consult the user documentation for the press and Fiery Server that will be used for this How-To exercise.

Creating Local Presets Process

1. Open your Fiery Driver and select the **Image** tab drop down menu.
2. Under the Image tab, enable the check boxes for **Image Smoothing** and **Apply Image Enhancement**.

3. Make any other setting changes you wish to apply to the preset, such as media or finishing options.
4. When you have applied the desired settings, select the Preset dropdown menu and choose Save Preset with the name ImageBoost. (Note that preset names may not contain spaces or special characters).

5. The preset will now be available for use with this client print driver.

Steps to Verify and Use the Fiery Image Boost Preset From the Fiery Print Driver

1. Open **Connect_Alumni_Newsletter_LTR.pdf** or **Connect_Alumni_Newsletter_A4.pdf** in Adobe Acrobat or Acrobat Reader
2. Select **File, Print** and select **Properties**.
3. Print the file using default settings.
4. Select **File, Print** and select **Properties**.
5. Using the Presets drop down menu, select the new Image Boost preset.
6. Print the file with the Fiery Image Boost preset applied
7. Review the printed output and observe the improvements made with the preset applied.

Without Fiery Image Boost

With Fiery Image Boost

Always apply the Fiery Image Boost preset *first* - before any other setting. If a preset is applied after making other custom settings in the Job Properties, the Preset will replace them with just the preset job properties.

Note:

If you want to create an inclusive preset of both Fiery Image Boost and other print settings, then select the preset first, make the other custom settings, and then save a new preset.

EFI fuels success.

From Fiery to super wide inkjet, from the lowest cost per label to the most automated business processes, EFI has everything your company needs to succeed. Visit www.efi.com or call 650-357-3500 for more information.
