

Superior image quality for high-volume printing

Fiery® MIC-4160 for Konica Minolta AccurioPress 6120/6136/6136P Digital Press raises the bar with fast processing speed, outstanding image quality, and time-saving workflow.

Be more productive

Get top performance with the Fiery FS300 Pro platform and drive black-and-white devices through the tightly integrated Fiery workflow in Fiery Command WorkStation®. The Fiery server is fully compatible with the new Konica Minolta IQ-501 Intelligent Quality Optimizer for automated density control and accurate front-to-back registration, reducing operator set up time.

Impress with high image quality

Perform grayscale calibration to preserve and enhance shadow detail as well as maintain a precise match for upper and lower tonal ranges.

Inspect jobs in the optional Fiery ImageViewer for Black and White, and make black curve adjustments to achieve high image quality. Save the settings for future use to ensure consistency.

Fiery QuickTouch for fast job and device management

The Fiery NX One server includes the Fiery QuickTouch™ software on the touchscreen display, which gives faster views of job status information and access to server management. With just a tap, the display gives operators easy access to intuitive system installation, backup and restore functionality, plus system diagnostics.

Add more revenue streams

Offer personalized printing with the built-in Fiery FreeForm™ or using the supported industry-leading variable data printing (VDP) formats PPML and PDF/VT.

Integrate for greater efficiency

Integrate your print production workflow with EFI™ management information systems, Web-to-Print systems, and popular prepress workflows for end-to-end automation.
