

ImagePRESS Server D3000

Fiery FS600 Pro

Quality, automation, and productivity engineered to deliver more

The imagePRESS Server D3000, built for the Canon imagePRESS V1000, delivers advanced control and optimised output

Blazing through workloads

- Accelerate job turnaround with Intelligent HyperRIP™ by handling multiple jobs simultaneously, helping you meet tight deadlines without compromising quality.
- Cut setup time with Fiery JobExpert: it dynamically analyzes each job and selects the best settings for flawless results.
- Streamline your workflow using Fiery JobFlow™ Base, now integrated with Fiery Command WorkStation® for direct job submission.

Exceptional colour quality and consistency

Achieve stunning, consistent print quality with a fully integrated suite of automated colour management tools. Even less-experienced operators can deliver precise, professional results with ease.

This powerful new set of automated colour features includes:

- 1-step color management – Prepare media for production in one simple action with combined calibration and profiling, directly from Fiery Command WorkStation®.
- Zero-touch recalibration – Maintain color accuracy with automatic, scheduled recalibrations—no need to pause production.
- Spot Pro optimization – Automatically optimise an entire spot colour library or selected colors using the Canon inline measurement instrument, freeing operators to focus on other tasks.
- Colour profile use tracking – Easily monitor profile usage and troubleshoot colour-related issues with greater visibility.
