

FIERY[®] SPOT PRO

Spot colour management

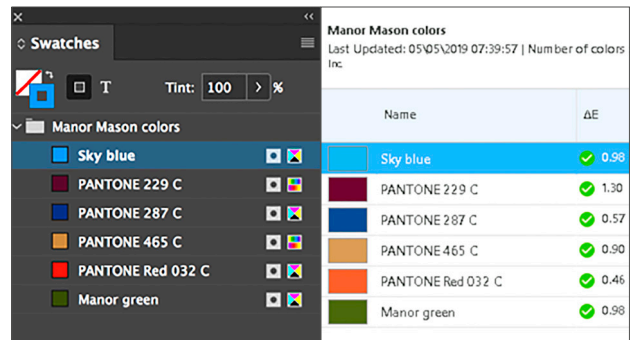

Your brand colour.
Perfectly printed.

Complete brand colour control.

Companies know that protecting their brand colours is key to maintaining their corporate identity. With Fiery® Spot Pro, your customers can be confident that their brand colours are reproduced correctly, every time. Integrated tools allow you to easily manage and edit spot colour libraries, ensure conformity to colour standards, and utilise tools for seamless collaboration with designers.

Work seamlessly with designers

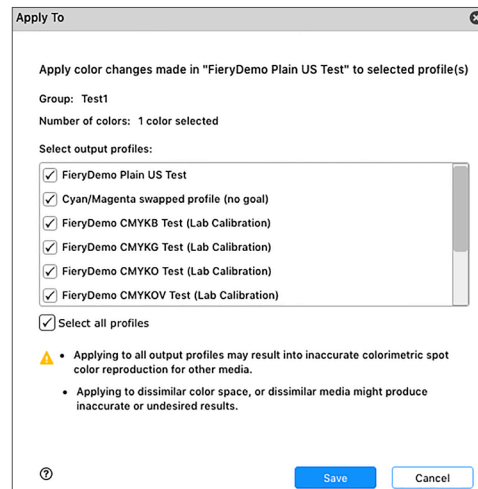

- Export/import spot colour libraries in Adobe® Swatch Exchange (.ase) or Color Exchange Format (.cxf), allowing print service providers and designers to work from the same named colour set
- Simplify spot colour management in a production workflow by using a spot colour alias*

Share a common spot colour library with designers.
Left: Adobe InDesign®. Right: Fiery Spot Pro.

Simplified spot colour management

- Quickly and easily create new spot colours and custom spot colour groups
- Apply spot colour edits to multiple media profiles simultaneously
- Create custom swatch books to fit your desired page size
- Search for spot colours across all available libraries

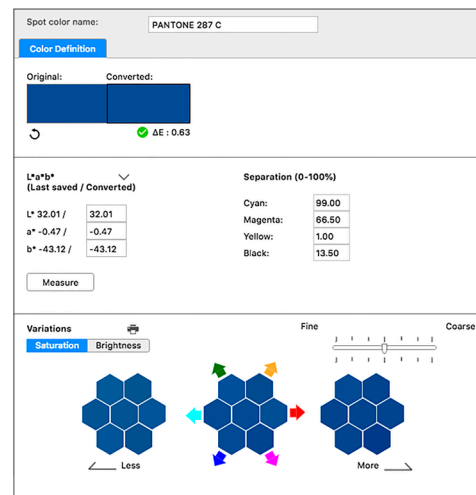

Apply spot colour edits to multiple output profiles.

Powerful tools to customise spot colours

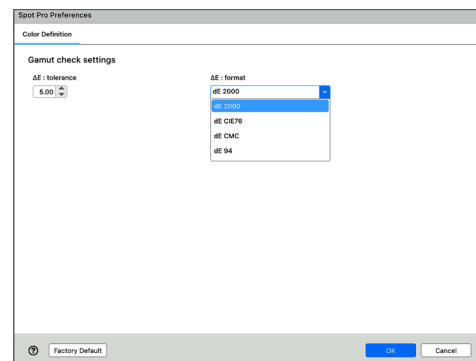

- Edit spot colours in device CMYK, CMYK+ (extended gamut), or device independent colour spaces (L*a*b or L*c*h)
- Optimise spot colours using a spectrophotometer (no Fiery Color Profiler Suite license required)
- Edit spot colour tints*

Edit spot colours in your desired colour space. Use the visual colour editor to refine spot colours.

Easily conform to colour standards

- View gamut warnings across an entire spot colour library or at the individual spot colour level
- Customise Delta E tolerance and standard to meet your production needs

Customise gamut warnings and Delta E standard.

*Requires Fiery FS400/FS400 Pro software

Get Spot Pro

Fiery Spot Pro is included with Fiery Graphic Arts Package, Premium Edition, Fiery Graphic Arts Pro Package, and the Fiery ColorRight Package. These professional print toolsets help reduce wasted prints and ensure that what you see is what you print. The appropriate package for your Fiery server can be purchased from your Fiery reseller.
