

FIERY[®] SPOT PRO

Spot color management

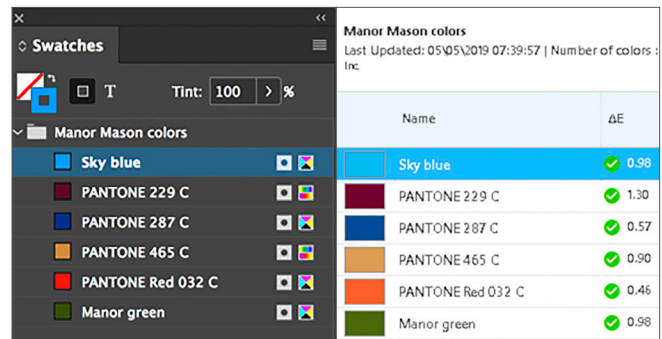

Your brand color.
Perfectly printed.

Complete brand color control.

Companies know that protecting their brand colors is key to maintaining their corporate identity. With Fiery® Spot Pro, your customers can be confident that their brand colors are reproduced correctly, every time. Integrated tools allow you to easily manage and edit spot color libraries, ensure conformity to color standards, and utilize tools for seamless collaboration with designers.

Work seamlessly with designers

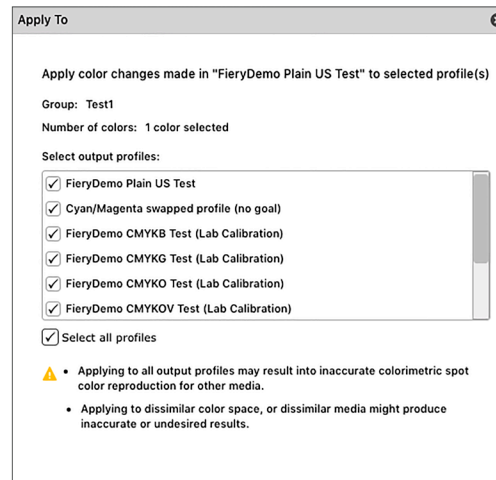

- Export/import spot color libraries in Adobe® Swatch Exchange (.ase) or Color Exchange Format (.cxf), allowing print service providers and designers to work from the same named color set
- Simplify spot color management in a production workflow by using a spot color alias*

Share a common spot color library with designers.
Left: Adobe InDesign®. Right: Fiery Spot Pro.

Simplified spot color management

- Quickly and easily create new spot colors and custom spot color groups
- Apply spot color edits to multiple media profiles simultaneously
- Create custom swatch books to fit your desired page size
- Search for spot colors across all available libraries

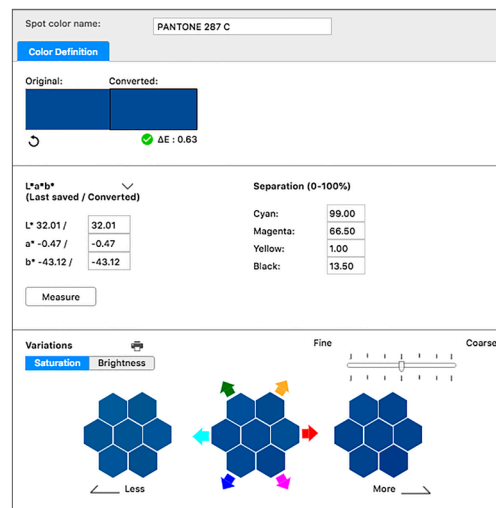

Apply spot color edits to multiple output profiles.

Powerful tools to customize spot colors

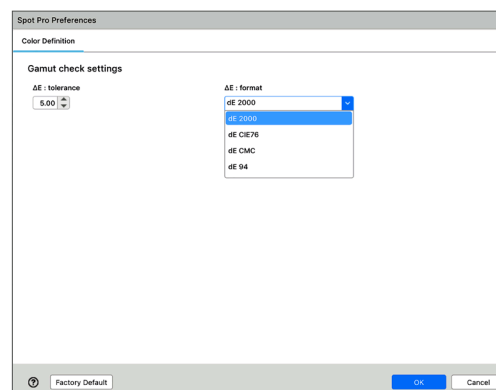

- Edit spot colors in device CMYK, CMYK+ (extended gamut), or device independent color spaces (L*a*b or L*c*h)
- Optimize spot colors using a spectrophotometer (no Fiery Color Profiler Suite license required)
- Edit spot color tints*

Edit spot colors in your desired color space.
Use the visual color editor to refine spot colors.

Easily conform to color standards

- View gamut warnings across an entire spot color library or at the individual spot color level
- Customize Delta E tolerance and standard to meet your production needs

Customize gamut warnings and Delta E standard.

*Requires Fiery FS400/FS400 Pro software

Get Spot Pro

Fiery Spot Pro is included with Fiery Graphic Arts Package, Premium Edition, Fiery Graphic Arts Pro Package, and the Fiery ColorRight Package.
