

Fiery® Self-Serve AdminCentral

Self-Serve and Payment System

A smart way to manage self-serve copy and print

Fiery Self-Serve AdminCentral, a cloud-based Web application, lets you easily manage your Fiery Self-Serve devices and Fiery PrintMe® service anywhere, anytime.

Easy to use and manage from anywhere

Fiery Self-Serve AdminCentral lets you configure and manage your Fiery Self-Serve devices such as the Fiery M600 station, as well as Fiery PrintMe Web service from anywhere — with just a Web browser. It's quick and easy to set up the devices and services in one or more locations, based on printing capabilities and customer needs. As needs change, you can easily adjust SKUs, pricing, and tax rates.

Low entry and maintenance costs

A flexible cloud-based subscription model makes it easy and affordable to offer new services. AdminCentral eliminates the cost and headaches associated with

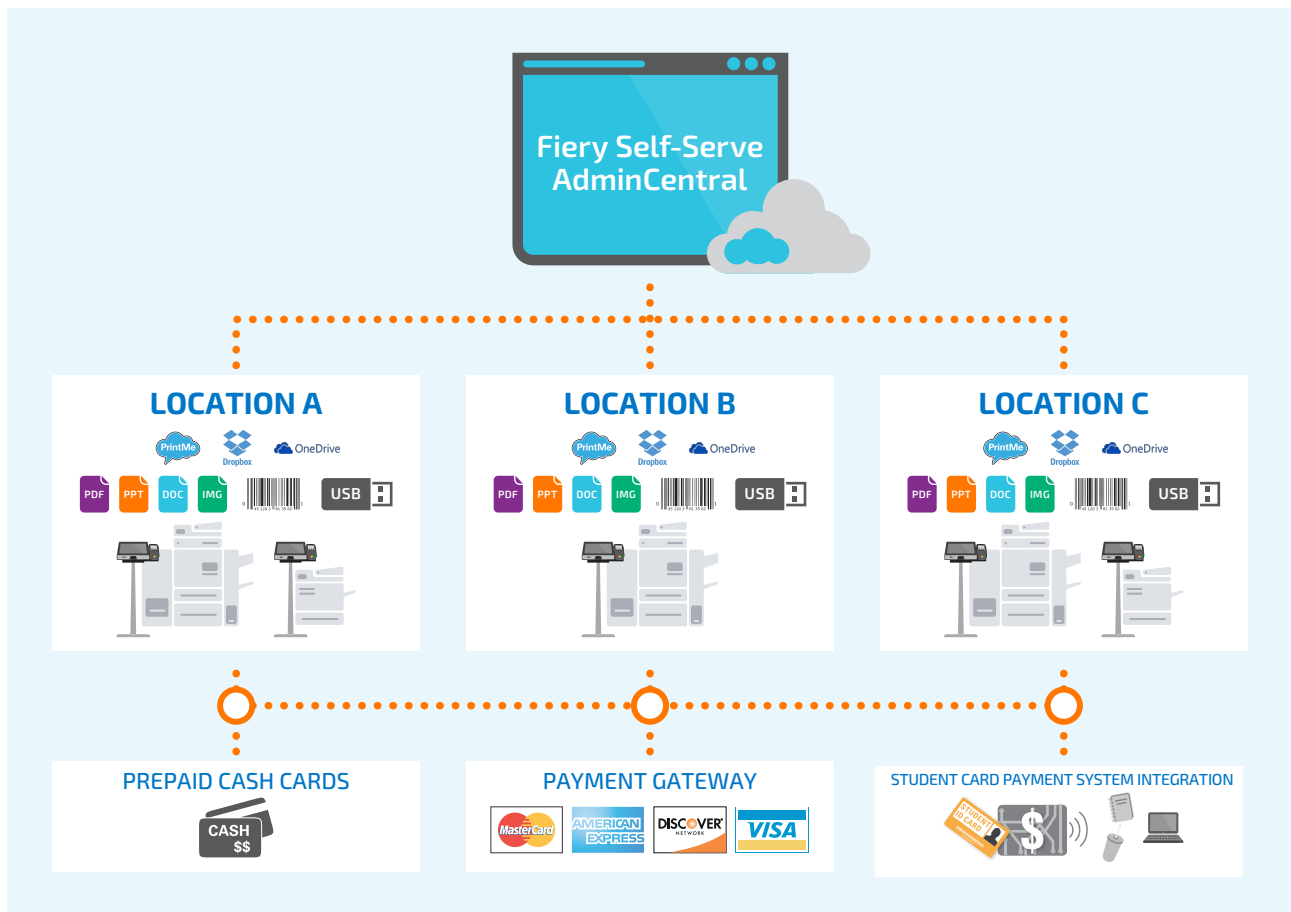

in-house servers, and one-click updates make it easy to apply upgrades to all of your self-serve stations, ensuring you always have the latest in security and features.

Real-time status checks and reports anytime

Monitor all your Self-Serve devices in real time using the AdminCentral dashboard. Securely check the status of all devices or get a revenue snapshot by device or location.

Select more detailed reports for a location, device, or transaction. Then print them as a PDF document on the fly or export to a CSV or XML file.

Cloud-based Web application to:

- Add/configure devices and print services
- Set/adjust prices and tax rates
