

Fiery® Cutting Options

for Fiery proServer and Fiery XF

Complete finishing tools for cutting devices

The Cut Server and Cut Marks Option for Fiery® proServer and Fiery XF give you the highest return on investment by making your business more productive, and by enabling your company to expand into high-margin applications. Over 2,100 different cutting devices are supported by over 135 manufacturers.

Cut Marks Option

The Cut Marks Option generates and places marks in your job, and can extract multiple cut paths. The option seamlessly connects to the Zünd Cut Center, which ensures a reliable cut workflow by eliminating errors and automating time consuming tasks.

This option also includes i-cut output for maximum flexibility and connectivity to any compatible third party cutting application.

Barcodes (Code 39 and QR codes) can also be automatically created for a wide range of cutters such as from Kongsberg, Summa or Zünd.

Cut Server Option

The Cut Server Option increases your productivity by seamlessly connecting your job output and your finishing processes. It lets you drive up to two cutting engines in parallel to meet those tight turnaround times.

In addition, this automated solution standardizes your cutting workflow for all supported cutter types and models.

For a full list of supported cutting devices, and which option they are supported by, visit solutions.fiery.com/supported/cutters.
