

Fiery® IC-319

Fiery FS600 Pro

Performance meets perfection

Unrivalled performance and stunning quality – elevate your profits with Fiery® IC-319 driving the Konica Minolta AccurioPress C14000/C12000 Enhanced and C7100/C7090.

Blazing speed

- Boost your production capacity with Intelligent HyperRIP™ which optimizes file processing and makes it easier for print service providers to adhere to tight turnaround times for higher volumes of shorter runs.
- Increase efficiency with the automation benefits from Fiery JobFlow™ Base, and now you can seamlessly submit jobs directly from Fiery Command WorkStation®.

Superior color accuracy

- Use Fiery Edge™ — the next generation Fiery color profiling technology — for stunning color with the smoothest color blends, maximum shadow details, and superb image definition.
- Fiery color management automation is a combination of two features working in harmony to effortlessly achieve incredible color, even for beginners, all within Command WorkStation. Media can be calibrated and profiled in just a single step, and then zero-touch recalibration keeps color consistent with the IQ-501.
- Minimize waste, reprints, and rejected jobs with Fiery ColorGuard™ — a cloud-based color verification solution — to track color quality; and integrates with the IQ-501 for a hands-free color quality control.

Outperform your competition with smarter prepress

- Produce the most accurate brand colors, correct images on the fly, and generate soft proofs with the included Fiery Graphic Arts Pro Package.
- Use Fiery JobMaster-Impose to automate document imposition and perform complex job preparation.
- Reduce setup time with Fiery JobExpert™ that can analyze the print jobs and dynamically chooses the optimal print settings.
