

# FIERY<sup>®</sup> DIGITAL FRONT ENDS

Solutions for large format applications

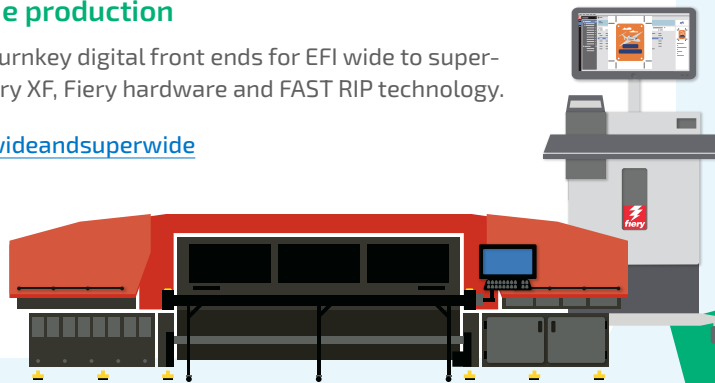

# Fiery solutions for large format applications

Fiery's portfolio of printer-focused digital front ends provide the most complete solutions whatever digital industry, application, or product being produced. All jobs can be centrally managed with the world's most popular digital print management interface — Fiery® Command WorkStation®.

## Wide to superwide production

Fiery proServers are turnkey digital front ends for EFI wide to super-wide printers with Fiery XF, Fiery hardware and FAST RIP technology.

# Flexible and scalable future-proof solutions

A Fiery Software Maintenance & Support Agreement (SMSA) included for the first year with your Fiery purchase, provides phone support and an ongoing stream of software releases, including the latest device drivers, plus all minor and major product upgrades.

The modular software architecture allows you to add options such as additional printer drivers, advanced color features and production functionalities to grow according to changing business needs. Contact Fiery or your local reseller to purchase options listed below.

<b>Color Profiler Option</b>	Provides ICC-based tools for professional creation of ICC and device link profiles based on the renowned Fiery Color Profiler Suite.
<b>Cut Server Option</b>	Offers a comprehensive cutting solution that can drive more than 2,100 vinyl cutters and routing tables from industry-leading manufacturers.
<b>Cut Marks Option</b>	Completes and speeds up the production process by supporting all industry standard cutting and finishing marks and methods.
<b>Color Verifier Option</b>	Verifies the accuracy and repeatability of printouts through measuring and comparing color values against industry or in-house standards.
<b>FAST Processing Option</b>	Accelerates job processing by an average of 6 times and up to 13 times helping printers to run at capacity to maximize printer investments.
<b>Ink Saving Option</b>	Reduces ink consumption and ink cost while maintaining optimal image quality and color fidelity.
<b>Printer Driver Options</b>	Printer Options support a wide range of more than 2,400 inkjet printers from various printer vendors.
<b>ES-3000</b>	Fiery's M0, M1, and M2 compliant single pass spectrophotometer for Fiery output calibration, profile creation, and optimization.
