

Fiery® SC22C

Fiery FS600

Enhance your output with automation and superior performance

Enhance your productivity and improve output quality by integrating the powerful Fiery SC22C Server with your FUJIFILM Business Innovation Revoria Press SC285

Elevated productivity

- Discover a transformative production process through the cutting-edge Fiery® FS600 software. Its mix of management, automation, and robust processing capabilities unlocks the full potential of your printer.
- Elevate your printing operations with Fiery Command WorkStation®, offering efficient management that enhances output, minimizes errors, and improves overall efficiency seamlessly.

Increase efficiency with smart and intuitive solutions.

- Secure accurate brand color matching from Microsoft Office applications with the Fiery TrueBrand™ tool, converting RGB values into specific spot colors, such as PANTONE, for accurate reproduction.
- Unlock the power of personalized printing with Fiery FreeForm™ Create. Effortlessly incorporate variable elements like text, images, or barcodes into your existing files with just a few simple clicks.
- Optimize print quality and streamline processing times with the Fiery JobExpert and PDF Processing Kit, which automatically configures the best job settings. Additionally, take advantage of native PDF processing through the Adobe PDF Print Engine interpreter for optimal results.
