

Fiery® IC-323

Fiery FS600 Pro

Redefining performance and quality

Deliver unmatched speed and exceptional quality to maximize profitability with Fiery® IC-323, driving the Konica Minolta AccurioPress C14010/C14010S/C12010/C12010S.

Unmatched speed and efficiency

- Boost your production capacity with Intelligent HyperRIP™, optimizing file processing to help print service providers meet tight deadlines and handle higher volumes of shorter runs with ease.
- Save time and reduce labor costs with Fiery JobFlow™ Base by automating repetitive prepress tasks. Simplify workflows, minimize errors, and seamlessly submit jobs from Fiery Command WorkStation® to deliver exceptional results with confidence.

Exceptional color precision

- Fiery color management automation is a combination of two features working in harmony to effortlessly achieve incredible color, even for beginners, all within Command WorkStation. Media can be calibrated and profiled in just a single step, and then zero-touch recalibration keeps color consistent with the IQ-601.
- Use Fiery Edge™ — the next generation color profiling technology — for stunning color with the smoothest color blends, maximum shadow details, and superb image definition.
- Minimize waste, reprints, and rejected jobs with Fiery ColorGuard™ — a cloud-based color verification solution — to track color quality and integrates with the IQ-601.

Smarter prepress, superior results

- Produce the most accurate brand colors, correct images on the fly, and generate soft proofs with the included Fiery Graphic Arts Pro Package.
- Use Fiery JobMaster-Impose to automate document imposition and perform complex job preparation.
- Reduce setup time with Fiery JobExpert™ that can analyze the print jobs and automatically selects the optimal print settings for you.
