FIERY SCRIBE

AI-powered job setup from inbox to press

Free up your team,
let Fiery Scribe handle job intake

Fiery® Scribe eliminates the manual work of reading email inquiries and defining print settings.
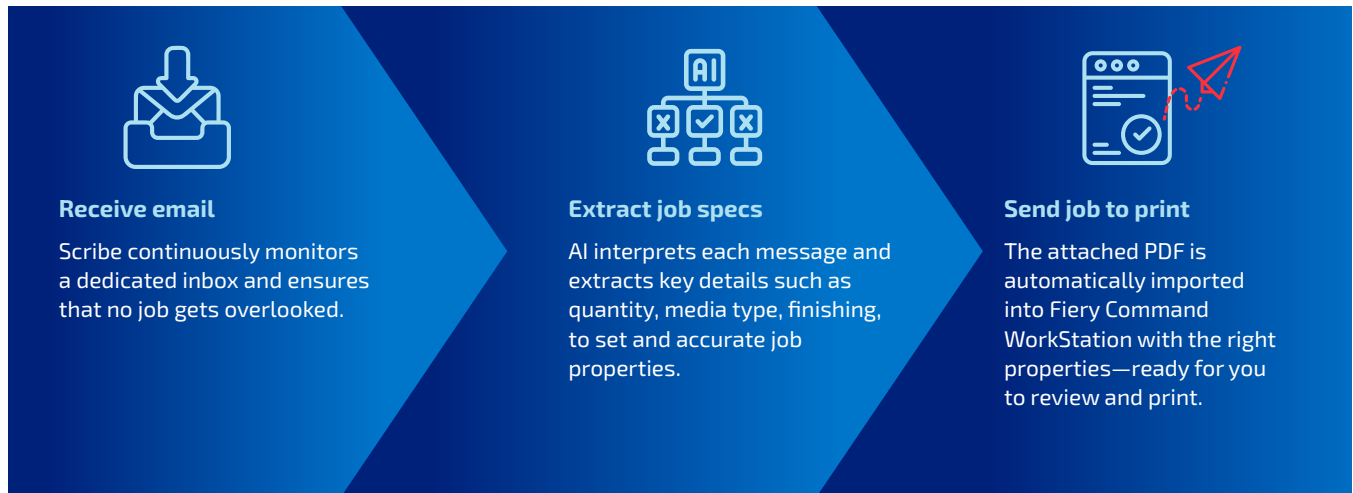

It instantly turns natural language input into ready-to-print jobs in Fiery Command WorkStation.®

Your team spends less time on admin, and more time delivering efficient, value-added services.

Introducing Fiery Scribe

Fiery® Scribe™ takes the busywork out of job setup, so operators can focus on producing more with fewer mistakes. With its intuitive interface and built-in validation, Scribe ensures that every job arrives in Fiery Command WorkStation ready to print.

Receive email
Scribe continuously monitors a dedicated inbox and ensures that no job gets overlooked.

Extract job specs
AI interprets each message and extracts key details such as quantity, media type, finishing, to set and accurate job properties.

Send job to print
The attached PDF is automatically imported into Fiery Command WorkStation with the right properties—ready for you to review and print.

Key highlights:

➤ Automatically imports customer PDFs to the Held queue with the right Fiery Job Properties

➤ Ensures consistency and accuracy

➤ Reduces time spent on manual tasks

➤ Speeds up approvals and production

Helping operators work smarter, not harder

- **Streamlined setup:** Automatically imports customer PDFs from email into the Held queue and applies the right Fiery Job Properties, so operators can start production faster.

- **Fewer errors, lower costs:** Reduces the risk of reprints and waste by making sure jobs are set up correctly the first time.

- **More time for high-value work:** Eliminates repetitive data entry, allowing operators to focus on quality control, problem-solving, and keeping production moving smoothly.

- **Adaptive learning:** Learns from past jobs to improve accuracy over time and further speed up job setup.

- **Faster onboarding:** Simplifies training by automating job preparation steps, helping new employees get productive more quickly.
