

Digital Factory 12

Smarter colour. Streamlined workflows.

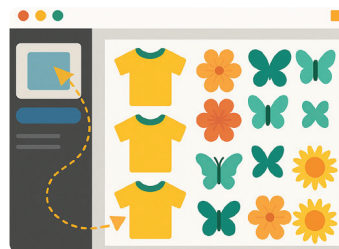

Why upgrade to version 12

Digital Factory 12 introduces new capabilities that help accelerate production, reduce costs, and deliver high-quality results. Upgrade to version 12 to benefit from enhanced workflows and new tools designed to scale with your business and support every stage of production, from small print shops to high-volume environments.

FEATURE HIGHLIGHTS

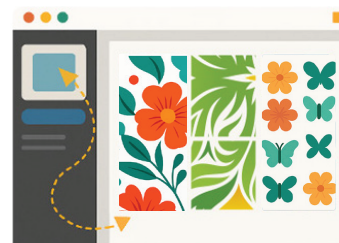

GANG SHEET BUILDER - ENHANCED IN 12.1

Create gang sheets directly within Digital Factory—no extra tools, no extra cost. Designed for workflows of any size, it enables bulk import of designs, layout organisation using nesting or free-form placement, and automatic cropping. Add labels and notes, and preview designs in real time. Once created, gang sheets can be sent directly to the queue or saved for recurring orders—all within a single, fully integrated workflow.

MULTI-LANE PRINTING - NEW IN 12.1

Optimise media usage and boost productivity with multi-lane printing. Divide wide-format media into independent lanes, allowing multiple jobs to run in parallel. Define the number of lanes, their size, and spacing to efficiently process multiple customer orders simultaneously.

FLUORESCENTS AS PROCESS COLOURS - NEW IN 12.1

Achieve vibrant, eye-catching prints with smooth blends and consistent colour results using fluorescent inks fully integrated into the printer's colour gamut—no manual spot colour setup required.

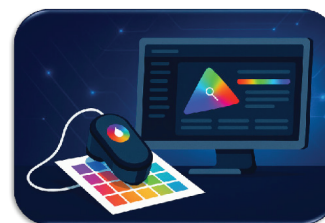

SATURATION RENDERING INTENT

A new rendering intent designed for the DTF and textile market. Enhances vibrancy—especially in mid-tones—while preserving natural detail in skin tones. This RIP-level improvement is selectable within standard colour management controls.

FIERY COLOR PROFILER (ADD-ON)

Professional ICC profiling for Digital Factory. Powered by the same technology behind Fiery Edge™, this add-on module enables precise printer calibration using supported spectrophotometers. Digital Factory 12 sets a new standard for colour management across the platform.

ADDITIONAL FEATURES

- **New printers and cutters support*:** Includes Epson SureColor G9000 (DTF), Epson V2000 and V4000 (UV), and cutters such as Summa Class 3 DTF, Mimaki CFX Flatbed, and F-Mark 2 System.
- **Optimized image loading*:** Faster image loading for a smoother, more responsive printing experience.
- **Software update notifications*:** Clear visual indicators when updates are available to keep your software up to date.
- **Full language support*:** Added support for Polish, Dutch, and Czech.
- **License self-reset*:** From version 12.1, users can reset licences themselves—no need to contact technical support when moving to a new computer or printer.
- **Print length marks:** Shows how much of the roll a job has used—helpful for cost tracking and identifying failures mid-print.

- **Pull cut mode:** Improved registration for thin films and complex shapes, especially near unsupported roll ends.
- **Screen selector tool:** Set the screening method per queue to better match material and application needs.
- **Mark system rotation:** Additional mark orientations to suit a wider range of cutter and printer requirements.

SMARTER COLOURS WITH FIERY COLOR PROFILER

- **Individual ink limit*:** Define the maximum ink limit for each channel to help prevent ink waste and reduce the risk of bleeding.
- **Spot colour management:** Includes up-to-date colour libraries with a new interface for spot colour selection, including the latest PANTONE® definitions.

SMARTER COLOUR. STREAMLINED WORKFLOWS. BUILT FOR WHAT'S NEXT.
