

FIERY® IQ

Make smarter decisions with data analytics

Data is knowledge.
Knowledge is power.
Use yours to do more.

You should do more with your data

Your print operation can generate an overwhelming amount of data without giving you truly actionable business insights. It's a struggle to analyse the true root cause of problems like low printer utilisation or poor-quality output. Plus, production teams without access to this real-time data will respond more slowly to unintended downtime or production-blocking events. This lack of real-time print production intelligence can result in lower profitability and higher production costs.

Hear what your production has to say

Now you can unlock the value of your production data by connecting your printers to Fiery® IQ™. This suite of mobile and cloud applications lets you elevate your day-to-day production and business management with real-time answers to pressing questions like:

- How well is my shop running today?
- Are my printers being utilised correctly?
- Is there a disruption in my shop I need to know about?
- Am I able to check my printshop status from anywhere, at any time?
- How much ink did we consume in the last quarter?*

* Ink cost tracking is only available for Large Format and High Speed Inkjet printers.

Stay competitive and grow

The IQ suite captures and presents data in a way that makes it easy to monitor print device performance in real time and make smarter decisions from production analytics. This allows you to make data-driven decisions that help you optimise your production and quality processes to improve ROI, minimise cost, maximise profit, boost revenue, and grow your business.

What can Fiery IQ add to my print business?

Fiery IQ applications can help you build a stronger, more profitable business by using your production data to:

App details

The IQ suite of applications lets you connect your processes, and print devices, so you can make better data-driven decisions. Use these free and paid applications to build a stronger, more profitable business with your production data:

Fiery Dashboard: Get a quick overview of the state of your printers today. Then use key production metrics to make data-driven decisions.

Fiery Insight: Use historical trends to improve future performance; compare performance between devices, shifts, or locations to increase shop floor productivity; and analyse ink* and substrate usage and costs for better pricing decisions.

Fiery Notify: Stay in control of production by receiving alerts about production-blocking events and production reports on a daily, weekly, or monthly basis.

EFI Go: Stay connected 24/7 using a smart phone or tablet, to remotely monitor printer status, job queues, and production downtime events so you can stay informed about your business anytime, anywhere.

Fiery ColorGuard:** Streamline the colour verification and calibration process to produce accurate and consistent colour — minimising waste, reprints, and rejected jobs.

Fiery Manage:** Standardise the server configuration for same-model print devices, check system compliance, and see printer status at a glance.

Customer quotes

John Princic, Real Marketing: "Before IQ we used to take snapshots of every meter on every machine, now I can tell how much was printed right from my phone as I am getting my coffee"

Bartosz przbyła, Studio DAR: "With Fiery IQ, we know exactly which materials increase retooling time on the machine. We have been able to optimize some of our actions, which significantly accelerates the production."
