

Unleash the full potential of affordable high-speed color

Run 160 ppm with no compromises. Combine the fast, compact RISO ComColor GD series with ComColorExpress FS2000C, the Fiery® digital front end, to acquire affordable high-speed inkjet printing with great productivity, ease of use, and color.

Always run at max speed

Perfect for direct mail, newsletter, statement or bill with personalization at maximum speed. Fiery FS200 Pro software supports all major variable data formats as well as the easy-to-use free FreeFrom™ VDP software.

Prepare complex jobs fast

Streamline job assembly with optional Fiery Impose, Compose, and JobMaster combined with RISO's unique inline finishers. The fully visual and intuitive makeready workflows get your jobs done fast and without waste for booklets, business cards, or manuals with custom bleed-edge tabs. Finish the job inline or easily impose layout for offline cut and stack.

Automate and integrate

Save time and work more efficiently. Drag and drop files to Fiery Hot Folders, or select a Fiery Virtual Printer from your typical file-print workflow, to turn all of your frequently used print settings into a single step. Industry certified JDF support and easy-to-use APIs allow you to integrate print production into prepress, e-commerce, or management information systems.

Get the best possible color with ease

Optimize color output and fix brand colors on the fly with powerful color calibration, matching, image correction, and proofing tools like Fiery Color Profiler Suite, Fiery Spot-On™, and Fiery Graphic Arts Package, Premium Edition.
