Enhancement for professional colour and print workflow management

MX-PE14 Fiery® Print Server

Lead with exceptional speed and quality with the Sharp MX-8090N and MX-7090N Colour Document Systems.

With the MX-PE14 Fiery® Print Server, these Sharp Pro Series Colour Light Production Printing Systems become powerful integrated solutions for managing office workgroup and centralised printing environments.

- Deliver fast processing speed
- Achieve unparalleled image and colour quality
- Offer powerful features that produce complex finished documents

Productivity starts with a fast RIP

The MX-PE14 Fiery® Print Server, based on the latest Fiery FS300 software, enables you to print large and/or complex Microsoft® Office® documents, PowerPoint® files and colour-critical PDFs accurately and quickly. It improves throughput and productivity by printing one page while processing subsequent pages, and by storing processed pages in memory before printing.

Get your corporate colours right

Produce precise, consistent colour from all applications, platforms and formats with Fiery colour management technology. Accurately match and manage corporate, PANTONE®, and custom spot colours with Fiery Spot-On™ to ensure consistent reproduction of your brand identity.

### Create professional printed materials quickly and easily

Produce professional materials in just three simple clicks with Fiery VUE, a 3D "visual print application" that guides you through an interactive and intuitive workflow—ideal for applications such as printed presentations, booklets, sales guides and training manuals.

Reduce costs

Fiery servers help control costs in many different ways. IT administrators can create Fiery Virtual Printers or customised printer drivers with appropriate print options for different groups of users or limit certain features to certain group of users. This enables users to print correctly, eliminating waste, with a simple File>Print operation.

Centralise Job Management

Fiery Command WorkStation® is a print job management interface which makes printing as easy and intuitive even for inexperienced operators, giving you complete, single-point control over every part of the print workflow.

Manage print jobs faster, boost print production with Fiery Command WorkStation® 6

Specifications

MX-PE14 Fiery Print Server

Server Type	E300 – embedded server
System Software	Fiery FS300
CPU Type	Intel® Celeron® Processor G1820
CPU Speed	2.7 GHz, Dual Core
Memory	2 GB RAM
Hard Disk Drive	500 GB
Operating System	Linux
Power Source	100-240 VAC, 50/60 Hz, 3 Amps @240 VAC, 1.5 Amps @240 VAC
Power Consumption	75w (Typical)/180w (Max.)

Fiery Productivity and Workflow

Fiery Command WorkStation 6

Fiery Driver 6.0

EFI Fiery WebTools™

Fiery Server Presets

Fiery Go

Fiery Hot Folders and Virtual Printers

Direct Mobile Printing

Fiery Colour and Imaging Technology

Fiery ColorWise® colour management technology

Fiery Color Profiler Suite (option)
