

Increase productivity and quality.

The Fiery® Productivity Package option for the embedded MX-PE14 Fiery Print Server includes a set of features essential for professional printing environments.

Image Enhance Visual Editor applies automatic enhancement to optimise image quality without going back to native applications.

- Advanced queue management controls to manage print priorities without disrupting production
- Image and colour quality adjustment tools for last-minute image editing, right in Fiery Command WorkStation®
- Powerful softproofing and colour management tools to minimise errors and waste
- Workflow automation solution for production of ready-to-print files with the fewest touch points and least potential for human errors
- JDF technology to automate and integrate business and print processes for higher efficiency and increased profit

What's included

Here is the set of features included in the optional Fiery Productivity Package for MX-PE14 Fiery Print Server.

FEATURE	DESCRIPTION
Graphic arts filters for Hot Folders	Automates job submission through Hot Folders for graphic arts file formats
Schedule Print	Balances workload and prioritises print production to minimize production peaks and eliminate bottlenecks
Print/Process Next	Lets the operator pick the next job to process or print immediately after the current job
Fiery Image Enhance Visual Editor	Adjusts individual images for brightness, contrast, highlights, shadows, colour balance, and sharpness without opening and editing the file in the originating application
Fiery ImageViewer	Enables the user to visually check the final processed job before printing and apply colour adjustments
Postflight report	Delivers colour-coded job diagnostic reports to quickly and easily identify potential printing issues such as mixed source colours and missing spot colours
Control bar	Provides colour quality control by placing the Ugra/Fogra Media Wedge, an industry-standard colour bar, and job settings on every printed page
Configurable auto trapping	Controls trapping parameters and corrects misregistration in composite or separated documents
Fiery JDF	Enables built-in JDF-based integration support to automate processes from job submission to output by integrating print workflow and business management systems so that job information can flow through the systems with less touch points and errors
Fiery JobFlow™ Base	Automates job preparation steps to increase productivity by eliminating bottlenecks, reducing repetitive work, and minimising touch points. Comes in two versions. Enable JobFlow Base (free) with the paid Fiery Productivity Package. Upgrade available to the full JobFlow version to expand workflow functionality.

EFI fuels success.

We develop breakthrough technologies for the manufacturing of signage, packaging, textiles, ceramic tiles, and personalised documents, with a wide range of printers, inks, digital front ends, and a comprehensive business and production workflow suite that transforms and streamlines the entire production process, increasing your competitiveness and boosting productivity. Visit www.efi.com or call 0808 101 3484 (UK only) or +44 (0)1246 298000 for more information.

Nothing herein should be construed as a warranty in addition to the express warranty statement provided with EFI products and services.
