

How-to: Connect Fiery Server to EFI IQ via EFI Cloud Connector

Feature overview

The IQ suite of applications lets you connect your print operators, processes, and print devices to make better data-driven decisions. The EFI Cloud Connector application connects Fiery servers to EFI IQ. It comes preinstalled in FS500 Pro and above Fiery servers and can be easily installed using Fiery Command WorkStation 6.7.

There can be situations when you have to manually install EFI Cloud Connector to connect Fiery servers to EFI IQ due to the following reasons:

- If you are using Fiery Command WorkStation 6.6 or below version
- If you are not using Fiery Command WorkStation
- If the Fiery server does not have internet connection

To connect a Fiery server without an internet connection, you need to first the install EFI Cloud Connector on a separate computer that has an internet connection. Then establish connection between the Fiery server and the separate computer. This guide will take you through the process of manually installing EFI Cloud Connector and connecting the Fiery server to EFI IQ.

Objectives

- Download EFI Cloud Connector
- Connect Fiery server to EFI IQ via EFI Cloud Connector

Additional resources
