

imagePRESS Server P400

Fiery FS500

Be more productive with improved performance and automation

Combining your Canon imagePRESS V900 Series printer with the imagePRESS Server P400 will help you maximize productivity and increase output quality.

Improved performance

- With the cutting-edge Fiery® FS500 software, productivity is increased to its highest level — thanks to a mix of management, automation, and processing power features that make the most of your printer.
- With the effective management of Fiery Command WorkStation®, you can boost output, lower mistake rates, and improve efficiency.

First-class automation tools

- With 1-step color management and Zero-touch recalibration in a suite of fully integrated and automated color management tools, you can make and maintain stunning, realistic colors with a minimum of operator intervention, so you can get outstanding and consistent print quality over time.
- Use server presets to make job submission fast and error-free. Or add the optional Fiery Automation Package to reduce job touchpoints and make your workflow even more efficient.
- Offer personalized printing with the Fiery FreeForm™ Create. Quickly personalize existing files by adding variable elements such as text, images, or barcodes with just a few clicks.
- The new, optional Fiery JobExpert and PDF Processing Kit automatically sets the optimal job properties to achieve the highest print quality with the lowest processing time. While the Adobe PDF Print Engine provides native processing of PDF files.
