

Fiery® proServer SE
Digital front end

Streamlined, efficient production

Fiery® proServer SE is a turnkey digital front end for driving selected EFI™ printers, providing production tools, colour management, workflow, and EFI FAST RIP technology. Its sleek industrial design delivers a highly effective and productive workspace.

The combination of EFI Fiery server technology and workstation provide the ideal ergonomic workspace for all users.

Efficient, space-saving design

The innovative design provides an efficient working environment for EFI printer users. The workstation optimises space usage, and helps keep items needed for daily production within easy reach. The table offers a large work area to perform activities such as calibration and profiling. The wireless mouse and keyboard save space, and make the work area more flexible.

Three USB ports are easily accessible on the side of the QuickTouch display, and four additional USB ports are available at the rear of the server.

Fiery QuickTouch administration

Fiery QuickTouch™ software on the touchscreen display of the server gives access to server controls. With just a tap, the display gives operators easy access to essential server functions.

Learn about Fiery proServer features and full production capabilities at fiery.efi.com/proServer.

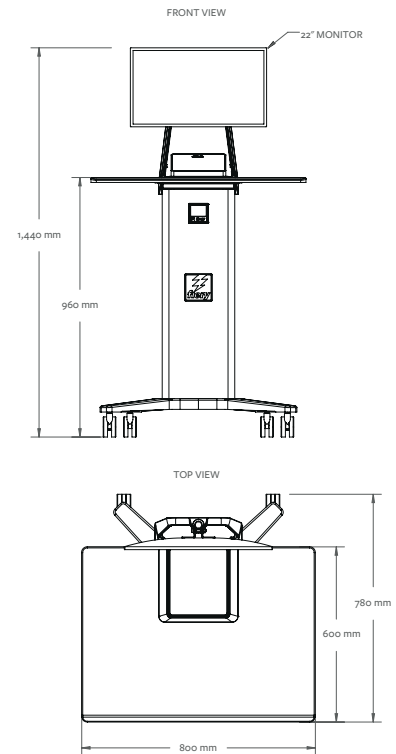

Fiery proServer SE specifications and options

- Operating system
 - Microsoft® Windows® 10 IoT Enterprise LTSC 2019
- RAM
 - 32 GB
- Hard drives
 - 1 TB
- CPU
 - 1 x Intel CORE I7-4770S, 3.1GHz
- Touch screen display
 - QuickTouch™ software
- Weight without packaging: 9.07 kg
- USB ports
 - 3 USB 3.0 ports on the side of the QuickTouch display
- Fiery XF server software for Windows® including:
 - Spot Color support
 - FAST RIP
 - Color Profiler Option
 - Color Verifier Option
 - Cut Marks Option
 - EFI measurement device
 - Printer Option EFI
